A GLOBAL BLUE MARITIME KNOWLEGDE HUB

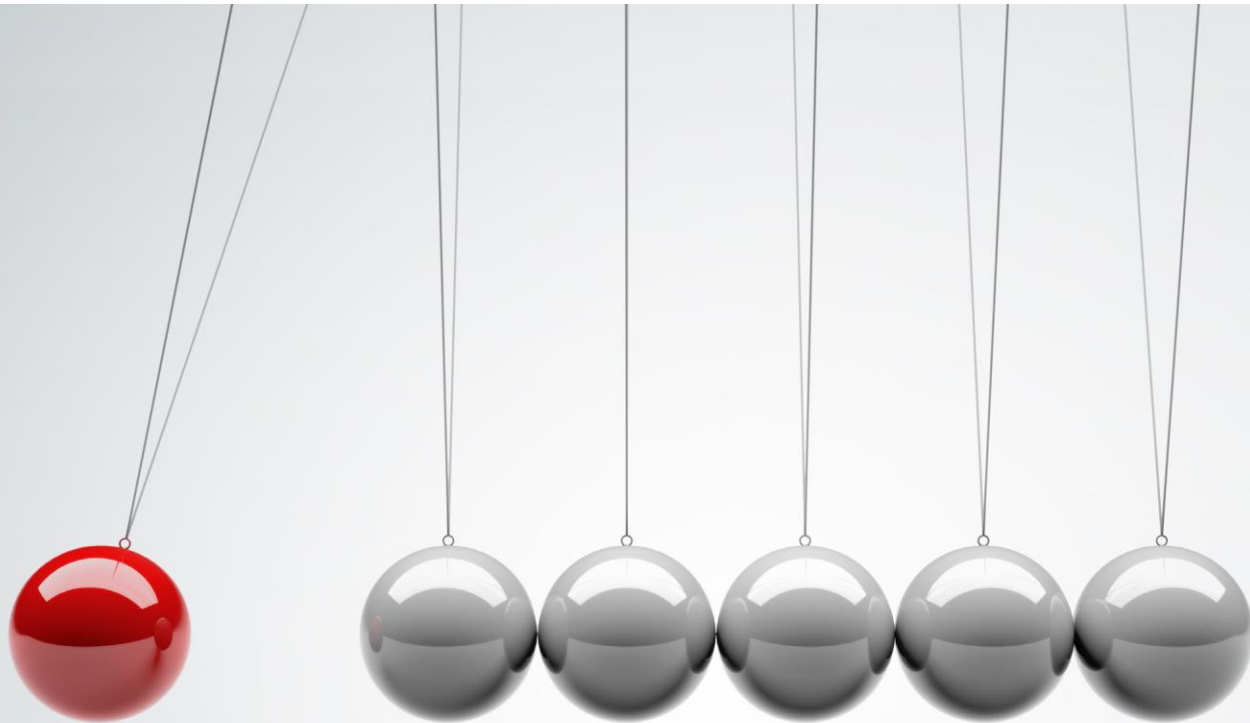

BLUE MARITIME – the future recipe for success

The BLUE Maritime project is to focus to the following mechanisms:

- Develop KNOWLEDGE LINKS to leading national and international environments for pioneering crossover maritime OCEAN SPACE INNOVATIONS.
- Simulation and VIRTUAL PROTOTYPING as a common platform to increase innovation speed.
- Global HOST ATTRACTIVENESS in order to attract talents, expertise, entrepreneurs, global enterprises and capital.
- Create global SME WINNERS.

The vessels, equipment and expertise from our cluster have all the qualifications necessary to become best at meeting the challenges of tomorrow, the same way they find a solution to current challenges.

THANK YOU FOR YOUR ATTENTION
